01 — WHO WE ARE

Specialist contractor. Tier-1 track record.

AZConnect Pty Ltd is an Australian-owned civil and telecommunications contractor delivering high-performance cable hauling, fibre installation and end-to-end project support across major infrastructure programs.

We bring 20+ years of telco infrastructure experience on the Telstra network and a safety-first culture to every site — from Tier-1 motorways to data centre backbones.

From WestConnex to M12, from data centre backbones to last-mile fibre, we've earned a reputation for hitting deadlines, owning the work, and getting tough jobs done right the first time.

02 — WHAT WE DO

Four services. One contractor.

- 1 Cable Hauling**
Fibre, copper and power cable hauling — long-distance, complex pulls, drum handling and pit-to-pit operations.
- 2 Fibre Installation & Commissioning**
End-to-end optical fibre install including splicing, jointing, termination, OTDR testing and certification with full as-built reporting.
- 3 Cable Recovery**
Decommissioning and recovery of redundant fibre, copper and power cables — safe removal, on-site reeling, and disposal or recycling.
- 4 Data Centres**
OSP and ISP hauls into data centres, large-quantity drum runs and high-speed network commissioning.

PROUD SUPPORTER
The Fred Hollows Foundation

AZ Connect donates to restore sight and end avoidable blindness.
